

SEAL FOR AN AUTOMOBILE OPTICAL UNIT

ABSTRACT OF THE DISCLOSURE

The present invention concerns a seal for an optical unit constituting an automobile indicating or illuminating light, intended to be mounted between this optical unit (1) and a support (6) in which it is inserted, the seal consisting of a sheet of flexible material provided with an internal orifice (12) intended to receive the unit.

According to the invention, the seal consists of at least one material with a self-adhesive surface skin formed by extrusion.
